HILL HOUSE X SERIAL CO

In line with *Hill House's* theme of nature and wellness, we have collaborated with Serial Co's NFT project, *BIOS: Living NFTs*.

BIOS: Living NFTs is a collectible NFT art project inspired by variegated plant collecting and the immortalisation of virtual plants on the blockchain. Living, not alive, these plants are fully digital inhabitants of the virtual world. The work is created as a randomly generated NFT that takes the form of variegated plants produced from a combination of 3D modelling, machine learning algorithms and procedural programming to produce 1024 one-of-a-kind 3D plants that can be viewed, owned, traded and will grow from a seed to a mature plant on the blockchain.
